

EOS Digital Factory Solutions

Dr. Hans J. Langer

Founder and Chairman EOS Group

Munich, October 10th 2018

EOS M 300 Series

Focus on highly **repeatable part properties**

Clear focus on **productivity** and **lowest cost-per-part**

Developed for automation and (software) integration in **current and future factories**

Scalable and flexible concept for **growing customer requirements** incl. superb process engineering

Our future portfolio is tailored for production

Summary

Additive Manufacturing **needs to integrate into the existing production world**
(part flow and data flow)

Our entire **R&D effort is geared to match our production customers' requirements**

It's not about machines – EOS provides **entire solutions**, needed to establish Additive Manufacturing in production

Our **next generation metal system** will proof point our vision – come and see us on Formnext!

Thank you.
