

AM Technology - Hardware: What's new?

Dr. H.-J. Langer

Founder and owner
Electro Optical Systems (EOS)

Munich, October 11 2017

EOS has a profound AM experience of more than 25 years

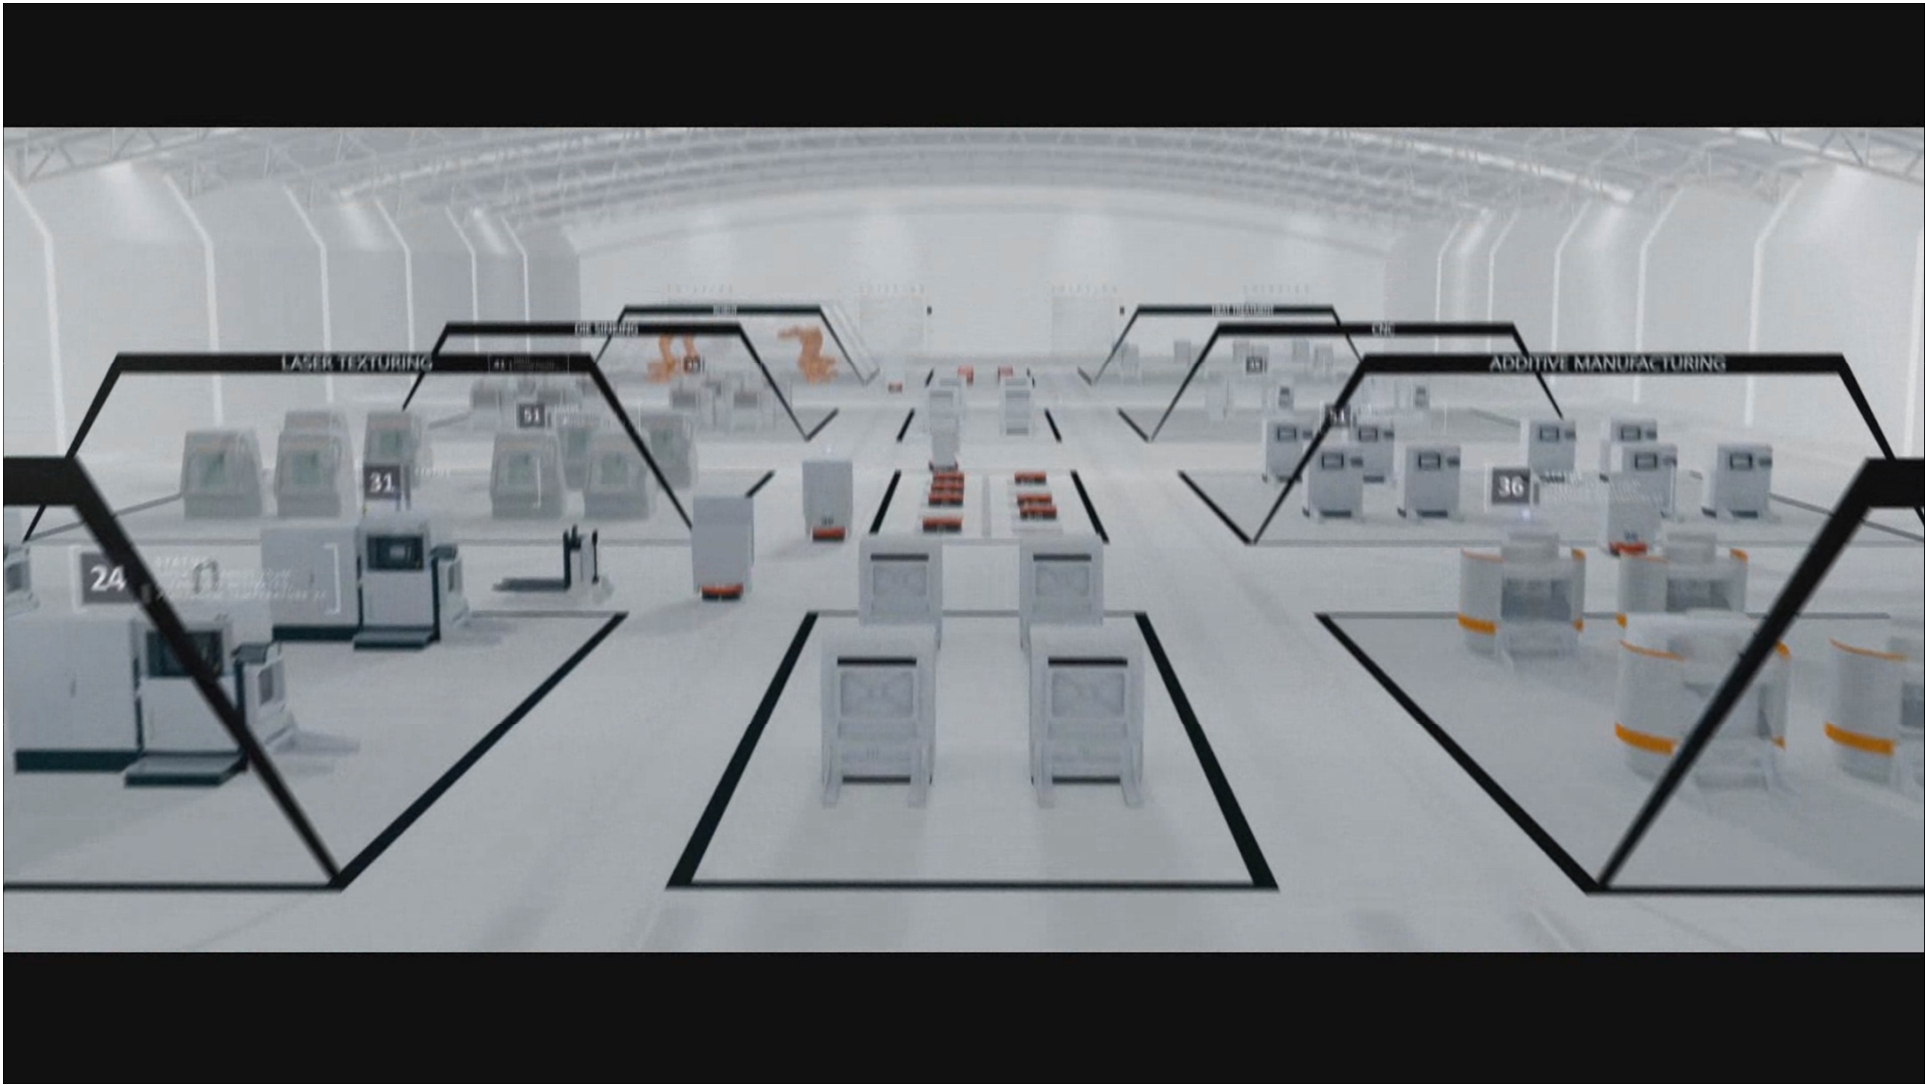

- Family-owned, founded in 1989 by Dr. Hans Langer
- End-to-end AM solutions:
From part design to part building and post-processing
- Revenue FY 15/16: ~ 315 Mio €
- Focus on medical, aerospace and industrial applications
- EOS is committed to:
Innovation – Quality – Sustainability
- Machine production capacity: >1,000 systems p.a.
- 3,000 systems installed worldwide

EOS Vision

Additive Manufacturing technology is an established and efficient way of industrial production.

While stepping towards production, different customer requirements have to be addressed

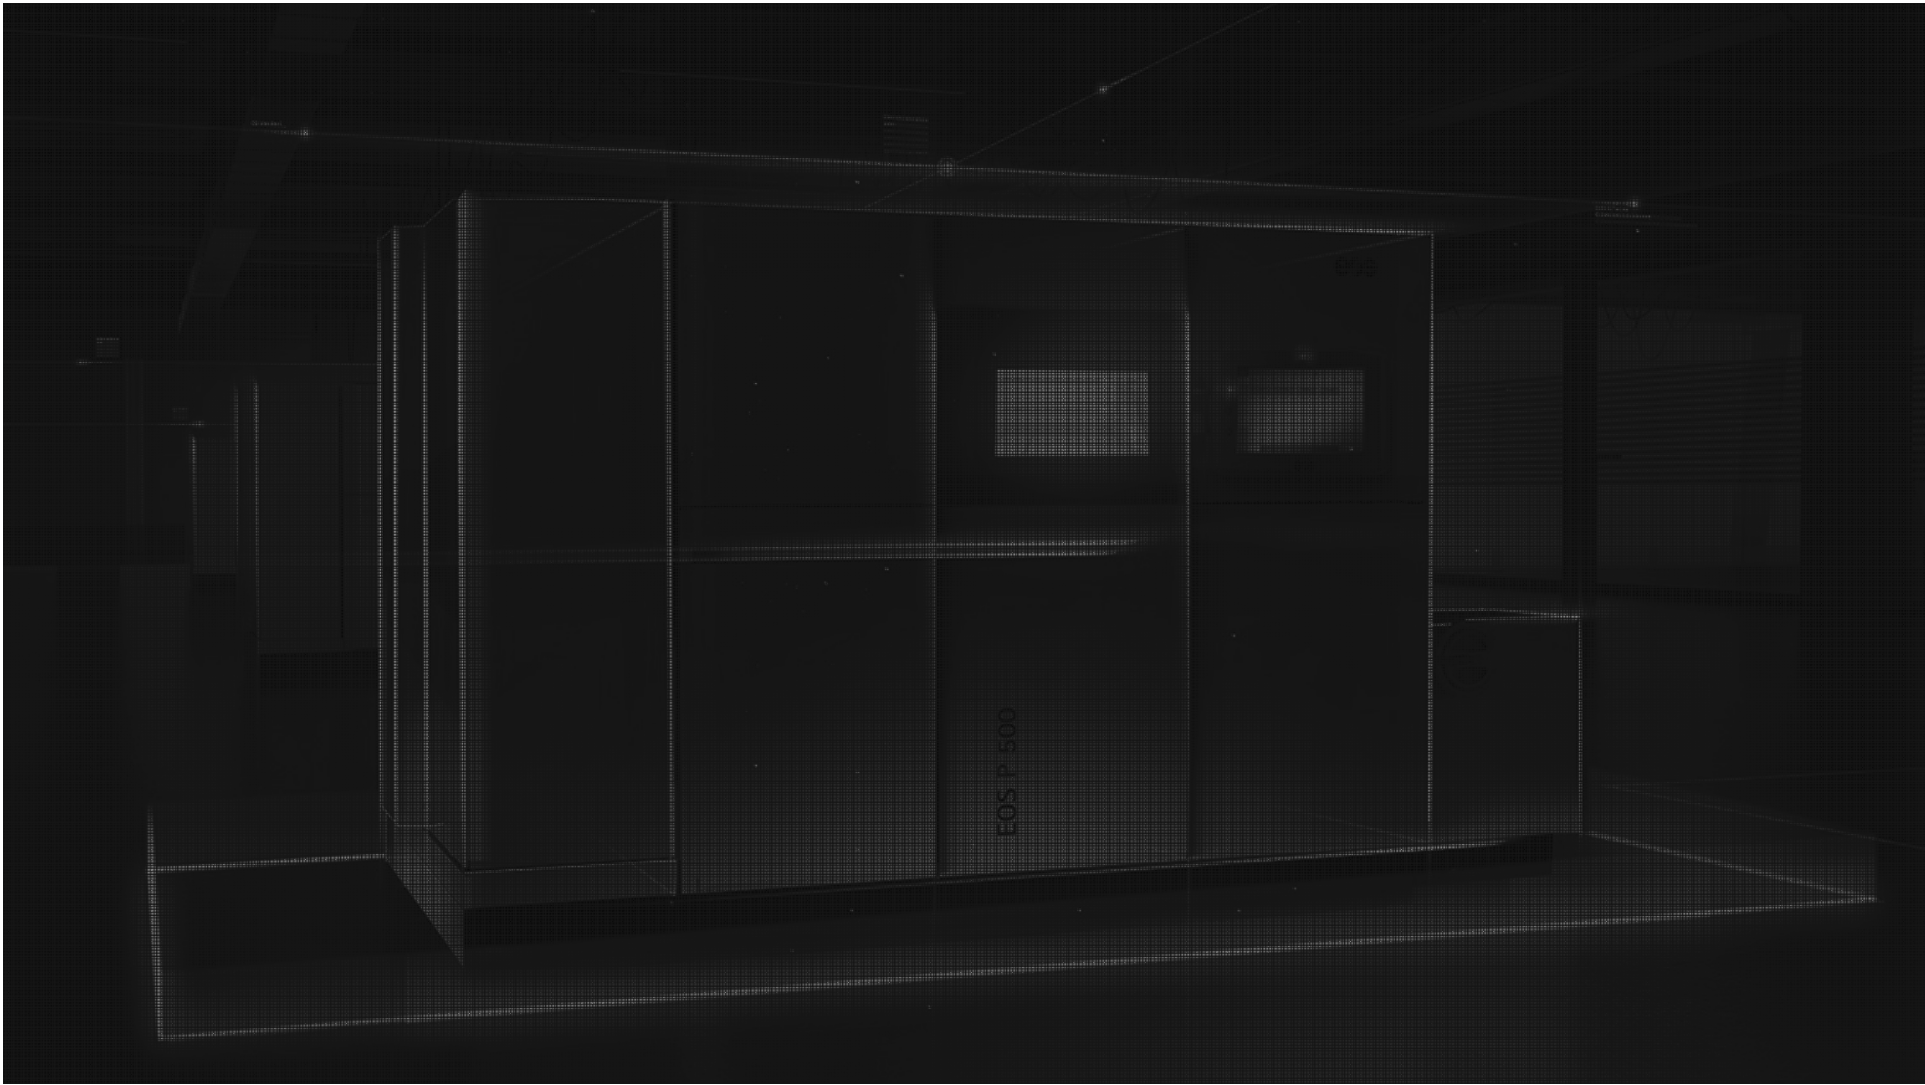

It is not only about technology, but people.

While stepping towards production, different customer requirements have to be addressed

EOS solutions to enable mass production

Our future portfolio is tailored for production

Summary

We believe, Additive Manufacturing **needs to integrate into the existing production world** (part flow and data flow)

Our entire **R&D effort is geared to** match our **production customers' requirements**

It's not about machines – EOS provides **entire solutions** which are needed to establish Additive Manufacturing in production

Our **next generation Polymer system** will proof point our vision – come and see us on Formnext!

More than 25 years in Additive Manufacturing

EOS HQ in Krailling, Germany
